

Ria S.

Software Developer · Data Science

+91 98210 02410 · 0304RIAS@gmail.com · Delhi, India · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

PROFILE SUMMARY

Software Engineer and Data Science student with demonstrated experience shipping full-stack, cloud-deployed applications. Adept at integrating ML/AI pipelines, computer vision, and AWS infrastructure into production systems. Passionate about building intelligent, scalable solutions — from wardrobe AI to personalised reading engines.

EDUCATION

B.Tech — Computer Science & Data Science — [Manipal University Jaipur](#)

2024 – 2028 | Jaipur

High School Diploma — [K. Bagrodia Public School](#)

2011 – 2024 | New Delhi

WORK EXPERIENCE

Data Science & Analytics Intern — [Future Interns \(Remote\)](#)

Oct 2025 – Dec 2025

- Conducted end-to-end analysis on e-commerce and social media datasets; delivered insights on customer behaviour trends.

Software Engineering Job Simulation — [J.P. Morgan](#)

Jul 2025

- Worked on a simulated financial data pipeline; implemented interface fixes and data visualisation using JPMorgan's Perspective library.

Data Analytics Virtual Experience — [Quantium](#)

Jun 2025

- Performed customer segmentation and uplift testing on retail transaction datasets to generate commercial recommendations.

Data Analytics Virtual Internship — [Deloitte](#)

Jun 2025

- Analysed forensic datasets; used Tableau and Excel to build dashboards identifying business risk indicators.

PROJECTS

WYA — What's Your Aesthetic May 2025 – Present Live: [dsbml6kwxecah.cloudfront.net](#)

AI-powered full-stack fashion web app — computer vision wardrobe intelligence, style profiling, and outfit recommendations.

- Built an end-to-end AI pipeline: background removal (rembg + OpenCV) → garment masking (GrabCut) → zero-shot classification via AWS SageMaker (FashionCLIP) → KMeans colour extraction → pattern detection → rule-based fabric classifier.
- Delivered 10+ features: Style DNA Quiz, AI Outfit Matcher, Green Score, Aesthetic Aura card, Vacation Packer, real-time Weather Styling, and push notifications (VAPID).
- Architected full AWS deployment: React + TypeScript frontend on S3 + CloudFront; FastAPI + Docker backend on EC2 (c7i-flex.large); SageMaker serverless endpoint; IAM instance profile auth; automated daily S3 backups.
- Implemented CI/CD via GitHub Actions (push-to-main → build + deploy + CloudFront invalidation); rate-limited AI endpoints with slowapi; 47 pytest tests covering auth, CRUD, and rate limiting.

Stack: Python · FastAPI · React · TypeScript · AWS (EC2, S3, CloudFront, SageMaker) · Docker · OpenCV · scikit-learn · SQLite

BookNest+ 2025 Live: [d2t9ocwr95ejyv.cloudfront.net](#)

Smart personalised reading platform — book discovery, library management, reading analytics, and AI recommendations.

- ▶ Engineered the Dynamic Reading Preference Algorithm (DRPA) — custom recommendation engine analysing reading history, genre preferences, mood trends, obsession tracking, and reading frequency to generate personalised picks and personality archetypes.
- ▶ Built features including in-browser EPUB reading (epub.js), personal book vault with S3-backed PDF/EPUB storage, mood-based system with 11 mood tags, book-to-movie mode via TMDB API, and reading streak analytics.
- ▶ Deployed identical cloud architecture to WYA: Node.js/Express TypeScript backend on EC2 (Mumbai) + React frontend on S3 + CloudFront; full CI/CD via GitHub Actions.

Stack: TypeScript · React · Node.js · Express · SQLite · AWS (EC2, S3, CloudFront) · Docker · JWT · Google Books API · TMDB API

Smart Resale Jul – Nov 2025

ML price-prediction model for second-hand phones and laptops.

- ▶ Built regression pipeline using Python, Pandas, and Scikit-learn to predict fair market prices for used devices based on specs, age, and condition.
- ▶ Achieved ~85% prediction accuracy; applied feature engineering on categorical device attributes (brand, storage, RAM) using one-hot encoding and label encoding.

Stack: Python · Pandas · Scikit-learn

SKILLS & TECHNOLOGIES

Languages: Python · Java · C · SQL (MySQL) · TypeScript · JavaScript

Frameworks & Libraries: FastAPI · Express.js · React · Node.js · OpenCV · scikit-learn · Pandas · NumPy

Cloud & DevOps: AWS (EC2, S3, CloudFront, SageMaker, IAM) · Docker · GitHub Actions · CI/CD

Data & ML: Data Analysis · KMeans Clustering · Computer Vision · Zero-shot Classification · Regression

Databases: SQLite · MySQL

Tools: Git · Pytest · Vite · Excel

CERTIFICATIONS

- ▶ IBM Data Analyst Professional Certificate
- ▶ Google Data Analytics Professional Certificate
- ▶ Google IT Automation with Python
- ▶ Meta Data Analyst with GenAI
- ▶ Programming in Java — NPTEL
